

PROJECT SESSION 6-3

By KolimNTCode

Bisakah kamu membuat robot
ini ke garis finish tanpa
menyentuh dinding?

SOLUSI

```
def turn_right():  
    turn_left()  
    turn_left()  
    turn_left()  
  
def jump():  
    turn_left()  
    move()  
    turn_right()  
    move()  
    turn_right()  
    move()  
    turn_left()  
  
while not at_goal():  
    if wall_in_front():  
        jump()  
    else:  
        move()
```

Bisakah kamu membuat robot
ini ke garis finish dengan
melompat tanpa menyentuh
dinding?

=Hurdle%204&url=worlds%2Ftutorial_en
%2Fhurdle4.json](https://reeborg.ca/reeborg.html?lang=en&mode=python&menu=worlds%2Fmenus%2Freeborg_intro_en.json&name=Hurdle%204&url=worlds%2Ftutorial_en%2Fhurdle4.json)

SOLUSI

```
def turn_right():
    turn_left()
    turn_left()
    turn_left()

def jump():
    turn_left()
    while wall_on_right():
        move()
    turn_right()
    move()
    turn_right()
    while front_is_clear():
        move()
    turn_left()

while not at_goal():
    if wall_in_front():
        jump()
    else:
        move()
```

Bisakah kamu membuat robot ini ke tempat garis finish dengan jalan yang tepat?

https://reeborg.ca/reeborg.html?lang=en&mode=python&menu=worlds%2Fmenus%2Freeborg_intro_en.json&name=Maze&url=worlds%2Ftutorial_en%2Fmaze1.json

SOLUSI

```
1 def turn_right():
2     turn_left()
3     turn_left()
4     turn_left()
5
6 while front_is_clear():
7     move()
8 turn_left()
9
10 while not at_goal():
11     if right_is_clear():
12         turn_right()
13         move()
14     elif front_is_clear():
15         move()
16     else:
17         turn_left()
```
