

SESSION 18-1

By KolimNT Code

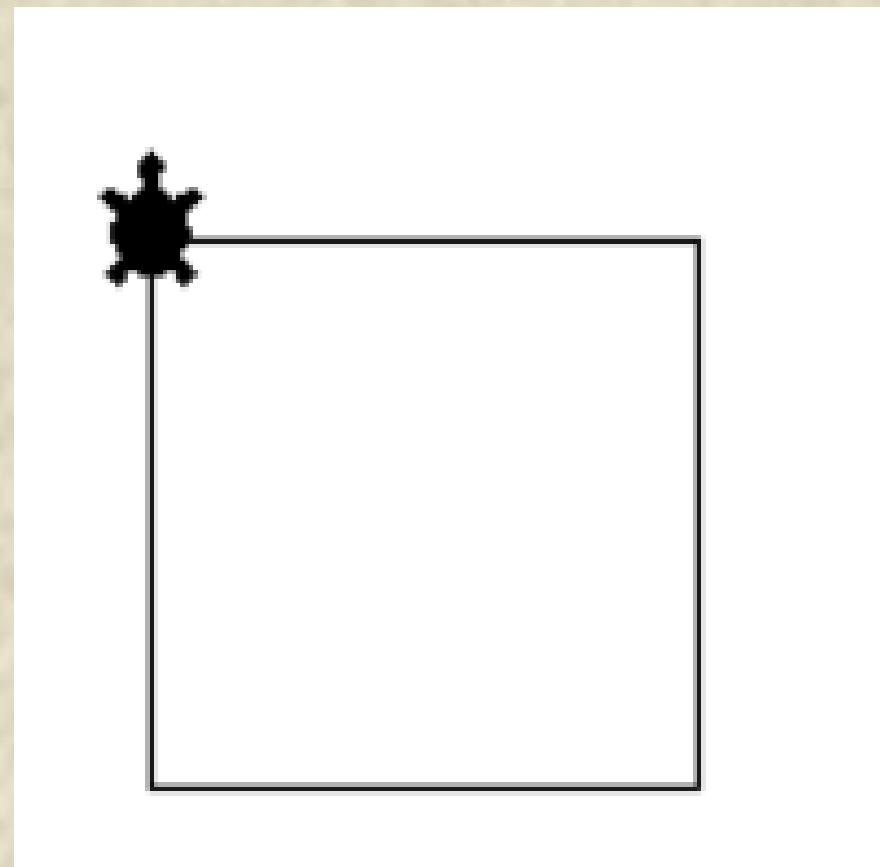

TURTLE

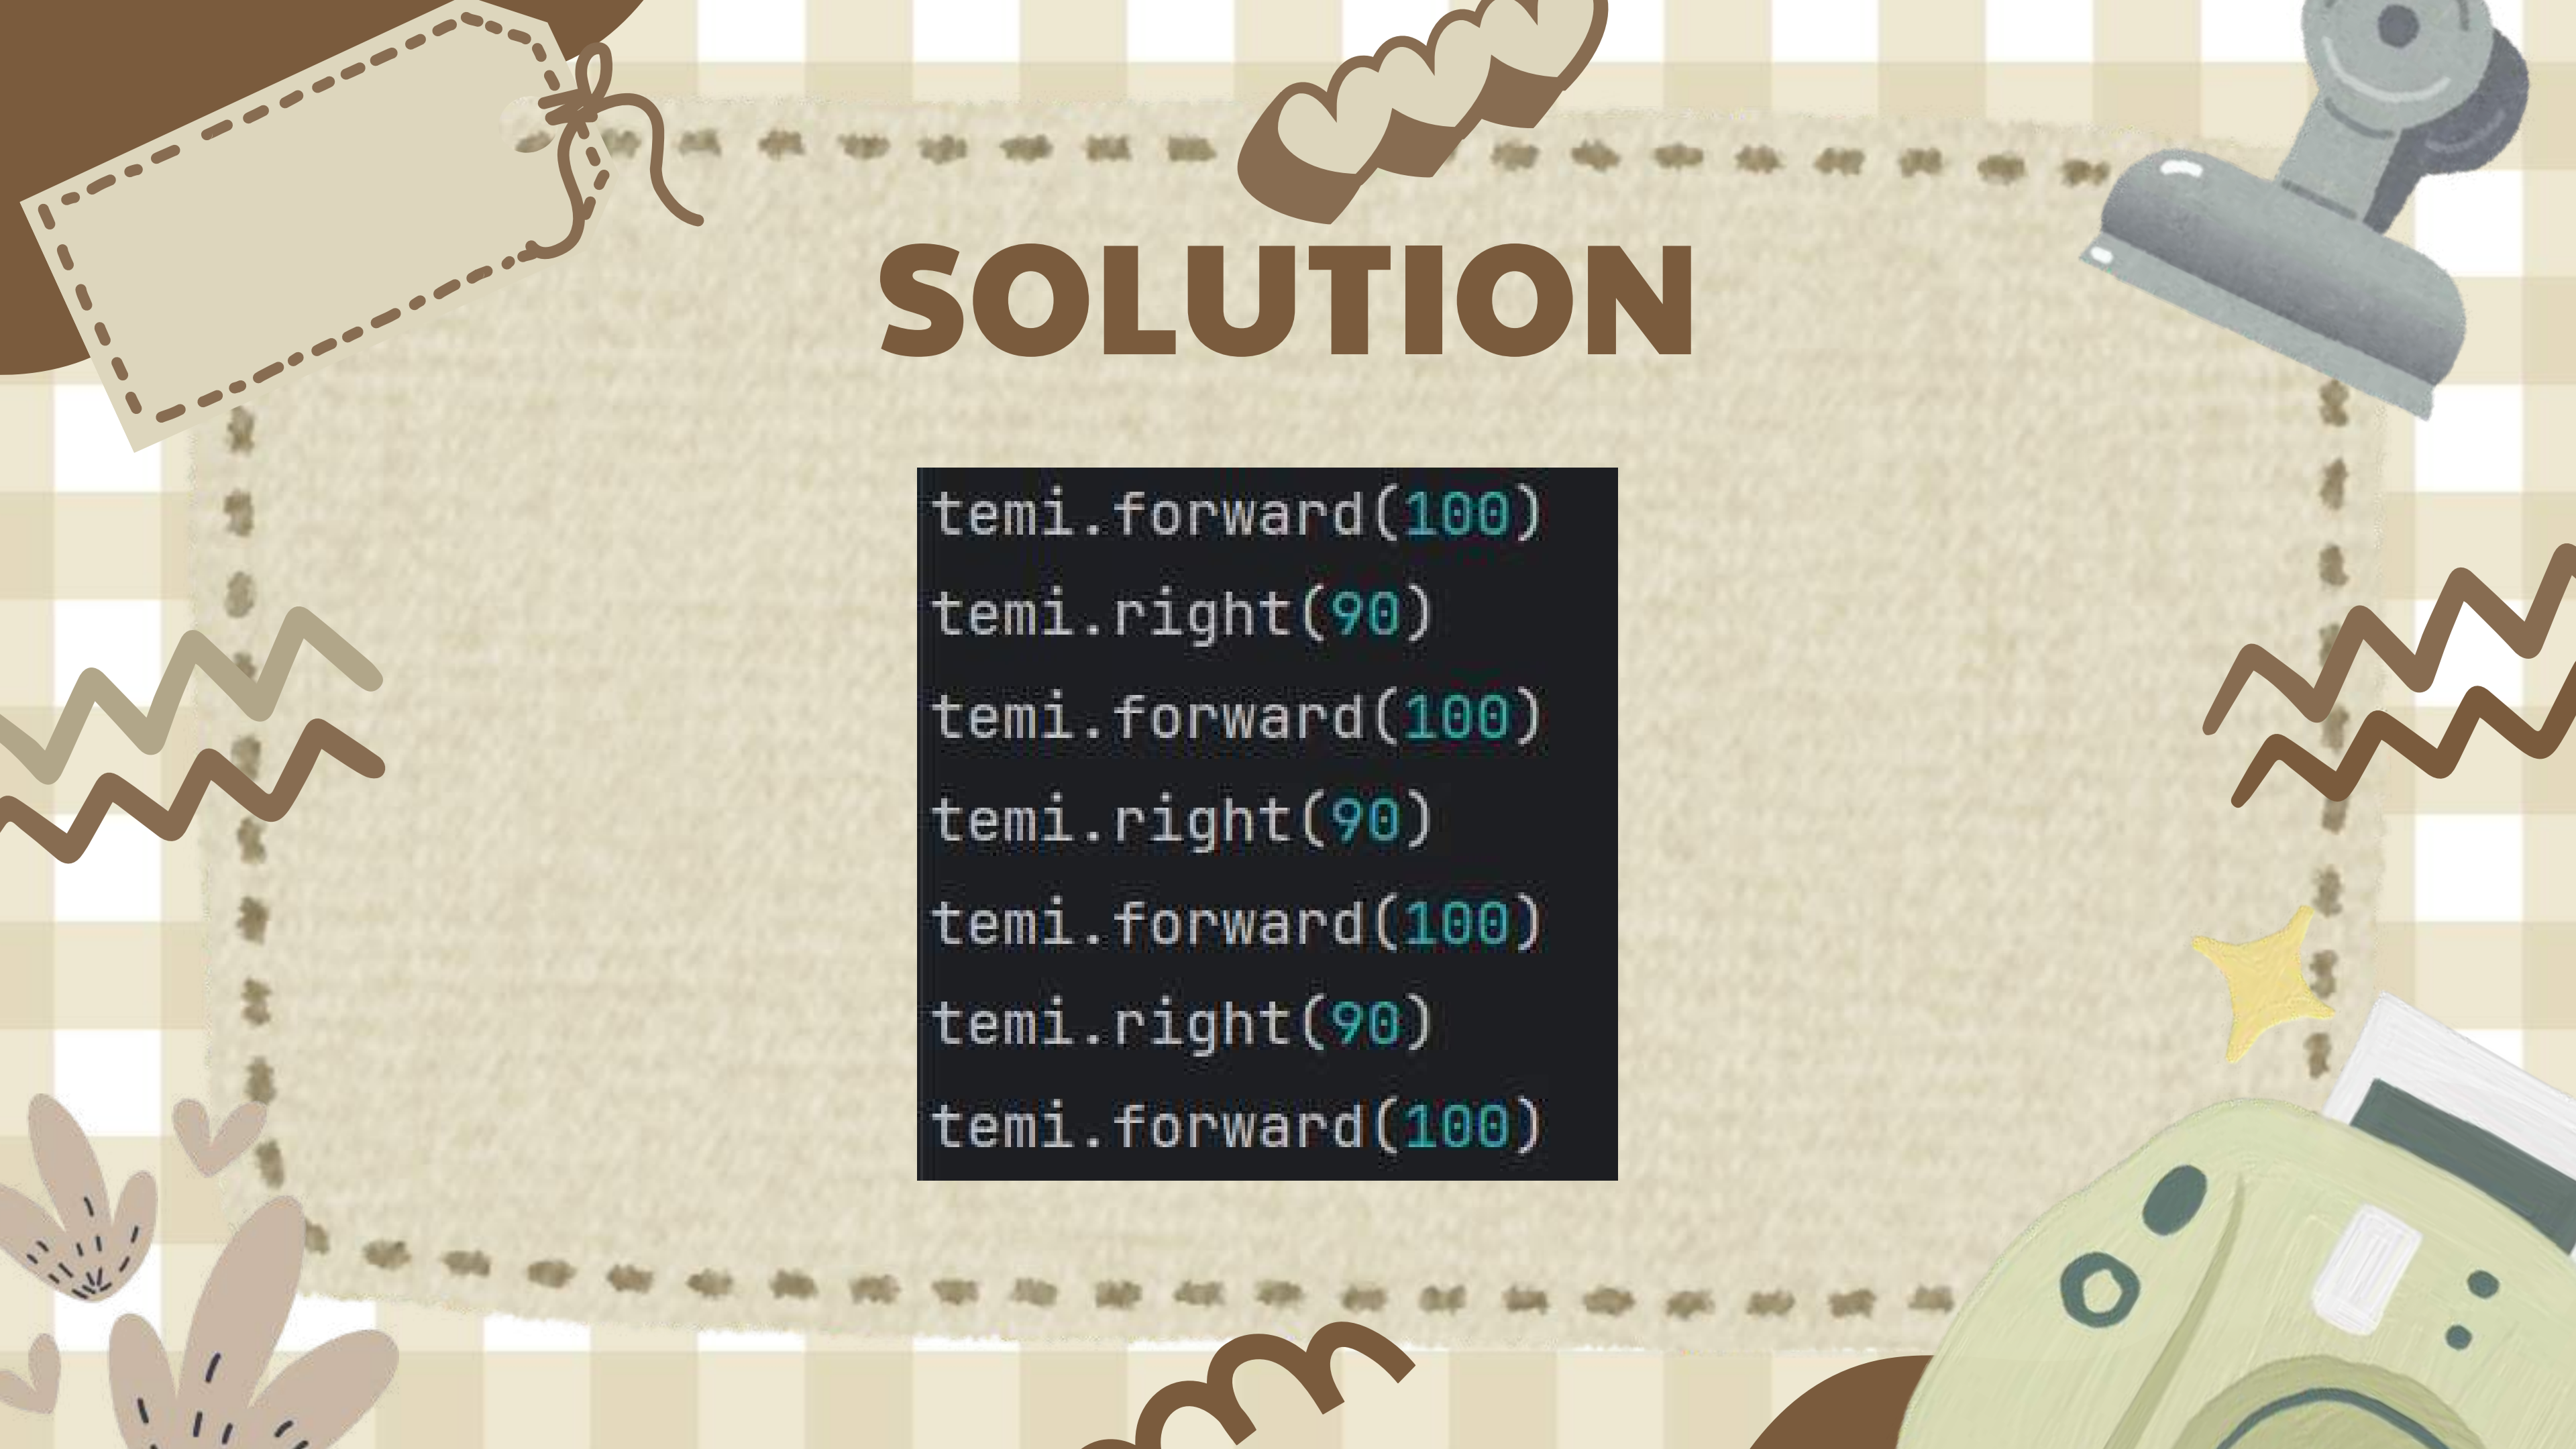

```
temi.right(90)
```

Cara mengarahkan turtle bernama temi ini menuju ke arah kanan menggunakan .right. Disini temi ke kanan sebesar 90 derajat

CHALENNGE!

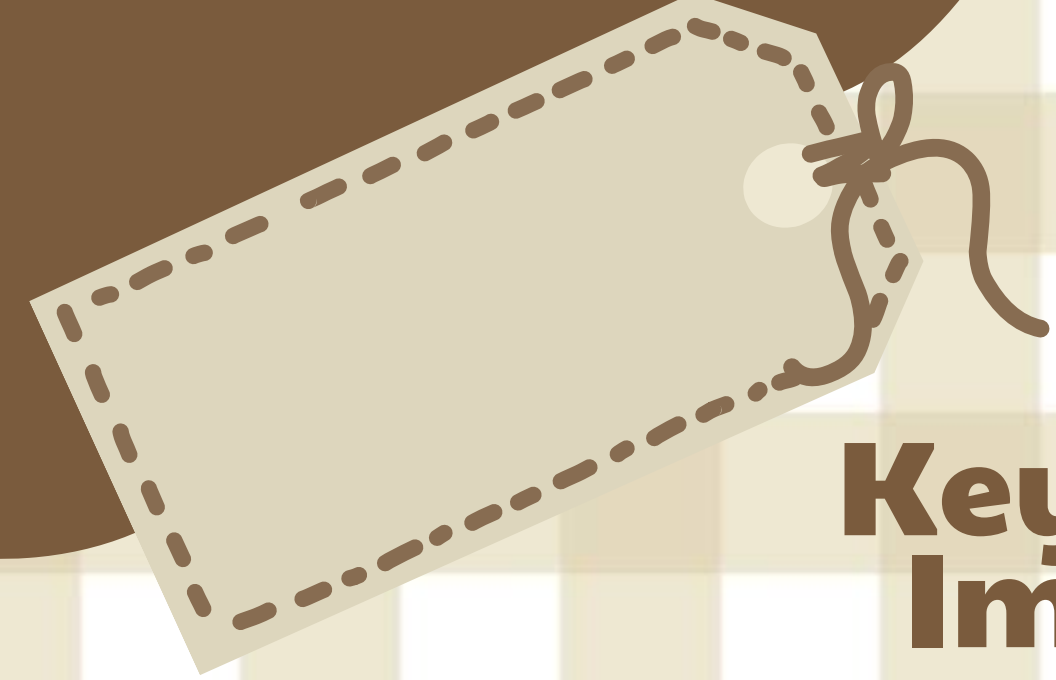

BISAKAH KAMU MEMBUAT TURTLE MEMBUAT
KOTAK?

SOLUTION

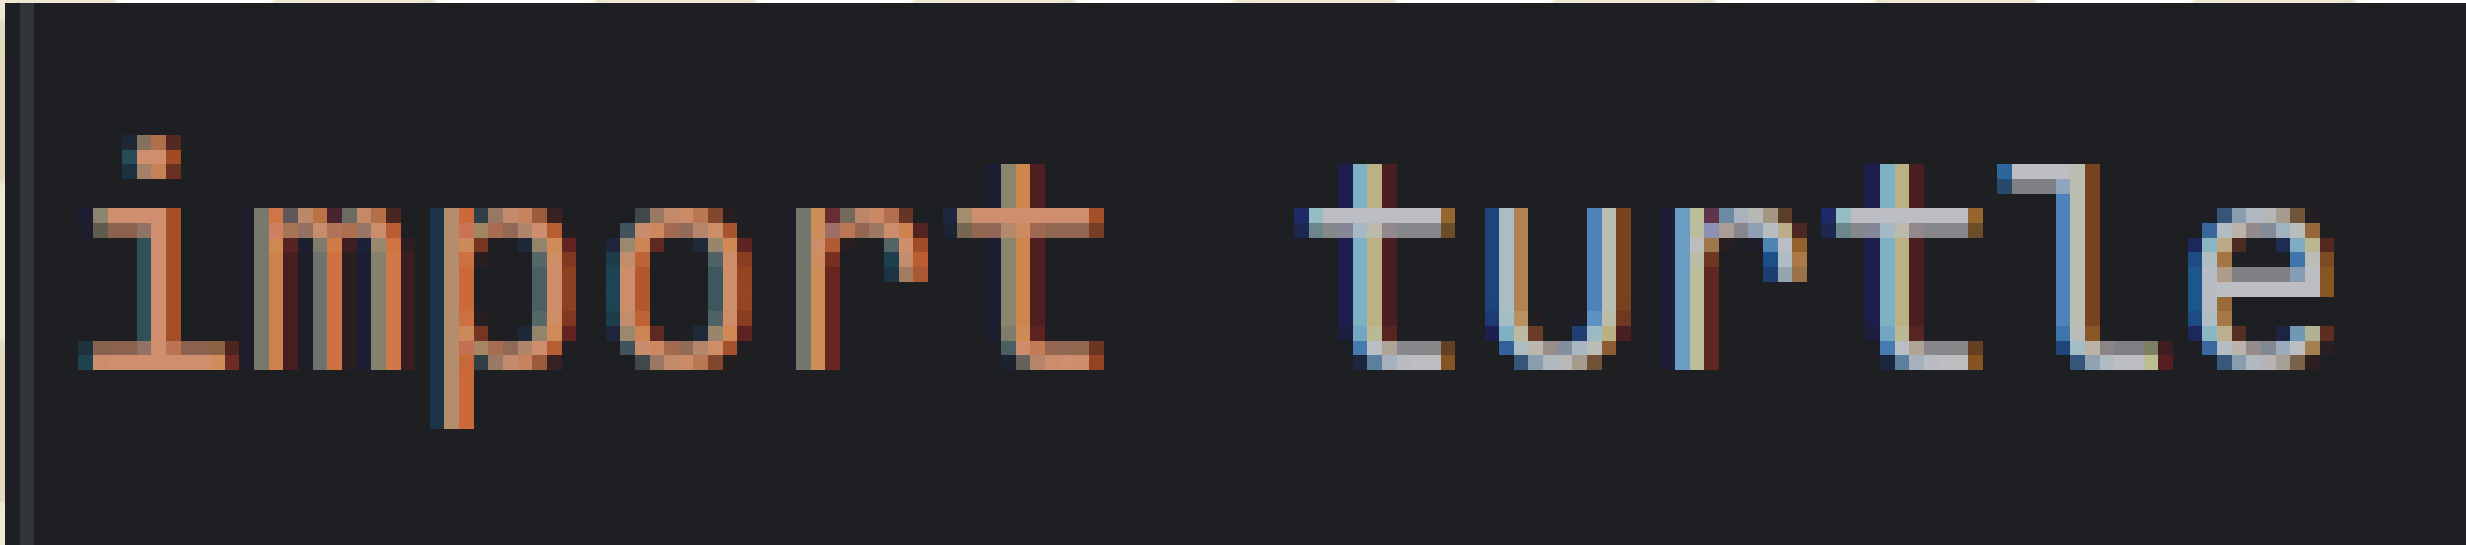

```
temi.forward(100)  
temi.right(90)  
temi.forward(100)  
temi.right(90)  
temi.forward(100)  
temi.right(90)  
temi.forward(100)
```

**Keyword
Import**

**Nama
Module**

```
import turtle
```

**Dan kita
lakukan ini**

```
temi = turtle.Turtle()
```

Disarankan

```
temi = turtle.Turtle()  
bima = turtle.Turtle()
```

Dari pada tulis seperti ini jika lebih dari 1 nama turtle

Keyword

modul

Keyword

**didalam
modul**

```
from turtle import Turtle  
temi = Turtle()
```

Ini lebih baik

IMPORT ALIAS

Keyword

modul

Keyword

alias

```
import turtle as t  
turtle = t.Turtle()
```
